

Postgres Staging Tables: staging_posts:

The screenshot displays the DBeaver database management tool interface. On the left, the Database Navigator shows the connection to 'postgres' on 'localhost:5432', with the 'staging_db' database selected. The 'public' schema contains two tables: 'staging_posts' (80K) and 'staging_users' (32K). The main window shows the 'staging_posts' table with 28 rows of data. The columns are 'id', 'userid', 'title', and 'body'. The data is displayed in a grid view, showing the first 28 rows. The status bar at the bottom indicates '10 row(s) fetched - 0.008s, on 2025-06-29 at 02:14:01'.

staging_users:

The screenshot shows a database management interface with a left sidebar containing a tree view of the database structure. The main area displays a table named 'staging_users' with 10 rows of data. The table has columns for id, name, username, email, address, phone, and website. The data is fetched from the 'public.staging_users' table. The interface also shows a script editor at the top with two SQL queries: one for 'staging_posts' and one for 'staging_users'. The bottom status bar indicates '10 row(s) fetched' and '6:27:155'.

	id	name	username	email	address	phone	website
1	1	Leanne Graham	Bret	Sincere@april.biz	("street": "Kulas Light", "suite": "Apt. 556", "city": "1-770-736-8031 x56442		hildegard

Fact table:

FactUserPosts:

The screenshot shows the SQL Server Enterprise Manager interface. On the left, the 'Database Navigator' pane displays the 'master' database with its 'dbo' schema and 'FactUserPosts' table. The 'Script' pane shows a query: `SELECT PostId, PostTitle, PostBody, UserName, UserEmail FROM master.dbo.FactUserPosts;`. The 'Results' pane displays the query output in a grid view, showing 29 rows of data. The columns are PostId, PostTitle, PostBody, UserName, and UserEmail. The data includes various user names and email addresses, such as Leanne Graham, Ervin Howell, and Clementine Bauch.
